Section 15.212 Modular Transmitters						
Request for Modular Approval     Request for Limited Modular Approval						
	Requirements	EUT Conditions	Comply (Y/N)			
Single Modular Approval Requirements						
1	The radio elements of the modular	The radio portion of this module has	Y			
_	transmitter must have their own	been shielded, please see exhibition				
	shielding. The physical crystal and	external photos.				
	tuning capacitors may be located	Provide Provide				
	external to the shielded radio elements.					
2	The modular transmitter must have	Buffered data inputs stage has been	Y			
	buffered modulation/data inputs (if such	integrated in chip PMB5747+PMB9933	*			
	inputs are provided) to ensure that the	integrated in emp 1 MB3 / 17 1 MB3 / 33				
	module will comply with Part 15					
	requirements under conditions of					
	excessive data rates or over-modulation.					
3	The modular transmitter must have its	The part number of the power regulator	Y			
	own power supply regulation.	is RF8081. Please see the schem.pdf	1			
4	The modular transmitter must comply	The requirements of antenna connector	Y			
'	with the antenna and transmission	and spurious emission have been	1			
	system requirements of Sections 15.203,	fulfilled, please refer to the Test Report				
	15.204(b) and 15.204(c). The antenna	exhibition.				
	must either be permanently attached or	CAMORION.				
	employ a "unique" antenna coupler (at					
	all connections between the module and					
	the antenna, including the cable). The					
	"professional installation" provision of					
	Section 15.203 is not applicable to					
	modules but can apply to limited					
	modular approvals under paragraph (b)					
	of this section.					
5	The modular transmitter must be tested	Please refer to the Setup Photo	Y			
	in a stand-alone configuration, <i>i.e.</i> , the	exhibition for the stand-alone test	_			
	module must not be inside another	configuration.				
	device during testing for compliance					
	with Part 15 requirements. Unless the					
	transmitter module will be battery					
	powered, it must comply with the AC					
	line conducted requirements found in					
	Section 15.207. AC or DC power lines					
	and data input/output lines connected to					
	the module must not contain ferrites,					
	unless they will be marketed with the					
	module (see Section 15.27(a)). The					
	length of these lines shall be the length					
	typical of actual use or, if that length is					
	unknown, at least 10 centimeters to					
	insure that there is no coupling between					
	the case of the module and supporting					
	mit tabe of the incame and supporting					

equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)).  6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.  (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1" or
